

# Can You Effectively Reverse Signs of Aging?

By THE AGELESS CENTER ATLANTA, GA

[www.theagelesscenter.com](http://www.theagelesscenter.com)

Dull, scaling, blotchy skin with wrinkles can make a person look older than they feel or really are. Loss of skin vitality is apparent as wrinkles appear on the face. Dynamic wrinkles, commonly referred to as 'smile lines' or 'frown lines', are the consequence of repeated facial expressions that form creases and eventually wrinkles. These are narrow depressions frequently seen in the forehead, between the eyebrows, crow's feet, and vertical lines around the lips. Skin fold wrinkles appear due to gravity and loss of fat and skin elasticity and result in sagging of cheeks. These wrinkles are most visible from the corner of the nose to the corner of the mouth also known as 'nasolabial folds' and from the corner of the mouth downward, known as 'marionette lines' or 'jowls'. Fortunately, effective treatments now exist for these various types of wrinkles.

## **BOTOX COSMETIC**

Botox Cosmetic is a safe, effective treatment for dynamic wrinkles in the forehead, between the brows, and in the crow's feet around the eyes. Botox Cosmetic is a purified protein that relaxes the underlying muscles causing the wrinkles to soften or disappear. Cosmetic injections take only a few minutes to perform and cause minimal discomfort. The effects of the treatment last approximately three months and subsequent treatments appear to last longer and longer with repeated injections done at every three month interval. After treatment, clients can resume normal activity and anticipate a smooth, fresh, and youthful look that will last for months.

## **RESTYLANE, JUVEDERM, AND PERLANE**

Skin fold wrinkles at the nasolabial folds and marionette lines or 'jowls' are best treated with facial fillers. Facial fillers are also utilized to increase the loss of volume in the cheeks due to age and illness. These fillers work by raising the wrinkle to the level of the surrounding skin, resulting in a softening of the fold and making it less noticeable. Various fillers are used to treat the different areas of the face. Restylane, Juvederm, and Perlane are three commercially available forms of hyaluronic acid. Since this is a naturally occurring substance that is part of the skin makeup, no allergy testing is required. These fillers can be injected into the lips to create a plumping effect that results in a youthful, pouty look by sharpening and redefining the edges of the lip. These fillers can also be used alone or in combination with other fillers to correct facial wrinkles. The hyaluronic acid based fillers function by attracting water molecules as well as stimulating collagen production. This creates a firm, plump underlying foundation for the skin. This helps fill in sunken areas and gives the face a smooth, youthful appearance. Benefits include instantaneous results with a minimally invasive procedure that is easy to tolerate and little downtime. Client's may experience temporary redness and swelling after treatment which subsides. Results last approximately 6 months or longer depending upon the client's metabolism.

## **RADIESSE**

Radiesse is filler that has gained much popularity due to its long lasting effects. This is a calcium based filler that also does not require allergy testing as calcium is a naturally occurring substance in bones and teeth. Radiesse works on the basis of creating a scaffold in which collagen can grow into. Radiesse is typically injected in the nasolabial folds and cheeks to act as a deep filler.

## **FACIAL SCULPTURING**

Facial sculpturing is a concept that uses a combination of fillers to give an optimal effect on wrinkle correction. This technique utilizes layering of fillers. One filler is placed deep in the skin, while another is more superficial, and layered on top. This results in an augmentation that may lead to longer lasting results and more complete wrinkle correction and volume.

Botox Cosmetic and dermal fillers are safe, non-invasive cosmetic procedures used for the treatment of dynamic wrinkles and skin folds. Get the revitalized, smooth and youthful radiant skin that you have been longing for.

*The Ageless Center is located at 2770 Lenox Road, Atlanta, GA 30324. We offer Botox Cosmetic and dermal fillers at an affordable price. Walk-ins and appointment scheduling that is convenient for you. For further information, a complimentary consultation, or to schedule an appointment, contact us at 404-233-5255.*
