Gastroenterology Consultants, P.A. Conducts Patient Satisfaction Survey

(HOLLYWOOD, FL), (May 28-2008) – Gastroenterology Consultants, P.A. conducted a patient satisfaction survey during the period from November, 2007 to February, 2008. The firm of Sullivan/Luallin—a nationally known leader in the field of patient satisfaction measurement for health care providers—was engaged to assist in the survey utilizing their statistically valid survey instrument and a current database of survey responses from over 3,000 patients of GI practices around the country.

The results reflected overall scores in the upper quartile of the Sullivan/Luallin database. In addition, the scores and percentile rankings showed that 90% of all patients would definitely recommend their physician at the practice to others. Overall survey results exceeded the database average on 32 of 36 of the measures used.

The physicians of the practice are among the most highly sought after in the specialty of gastroenterology throughout South Broward County and the Memorial Healthcare System.

This is the first time that Gastroenterology Consultants, P.A. has conducted such a rigorous effort to measure patient satisfaction. The practice has been in continuous operation for almost 40 years and is the largest practice of its type in South Broward County. In 2005, the physicians in the group developed and now operate South Broward Endoscopy, a licensed and accredited ambulatory surgery center (ASC) at which elective endoscopic procedures are performed each day.

“We are proud to see the practice’s commitment to patient service and satisfaction and how it positively affects the willingness of our patients to recommend our services to others.”

Wayne B. Schonfeld, M.D., F.A.C.G., Managing Shareholder
