

# DESCRIPTION OF SERVICES

## MICRODERMABRASION

Removal of dead and damaged skin cells by a jet of fine Microcrystals vacuumed across the skin. Procedure helps with skin texture and smoothness.

## SKIN REJUVENATION

Use of our state-of-the-art, FDA approved Intense Pulse Light (IPL) machine to:

- reduce pigmentation/discoloration
- reduce appearance of small vessels
- skin tightening
- acne treatment
- scar reduction
- reduce appearance of fine lines
- even skin tone and reduce pore size

## HAIR REMOVAL

Hair removal is achieved using an FDA approved IPL machine. The procedure results will vary depending on hair color and texture, as well as skin type.

## CHEMICAL PEEL

Our peels provide mild to deep exfoliation of the skin, with little or no downtime, resulting in accelerated skin cell regeneration. Skin will appear younger, softer and smoother. Additionally peels help to minimize fine lines and wrinkles, lighten hyperpigmentation and reduce acne breakouts.
