

BIOSKILLS LABORATORY

 PINEHURST SURGICAL

excellence in practice

PINEHURST, NORTH CAROLINA

Located in the center of the world-class resort area of Pinehurst, North Carolina, the BioSkills Learning Laboratory of Pinehurst Surgical is a world-class facility in its own right. Our BioSkills Laboratory is designed for multiple uses including:

- Surgeon/physician education**
- New surgeon recruitment**
- Technical staff training**
- Research & development**
- Product development and evaluations**
- Surgical and implant simulations**
- Medical educational seminars**
- Educational “wet lab”**

The lab is available to surgeons, physicians and health care professionals to experience hands-on training.

As a complement to our five workstations, our sophisticated video system provides visual enhancement to participants in the lab as well as studio-quality audio and video and conferencing to two separate conference rooms.

Outstanding features of our BioSkills Lab include:

Four dry/wet stations and a center fifth unit with an operating table

Four ceiling or wall-mounted video cameras with 180° image range

Video monitors on the workstations

Webcasting capabilities

Inflow system

Suction system

Lower countertop height

Task lighting

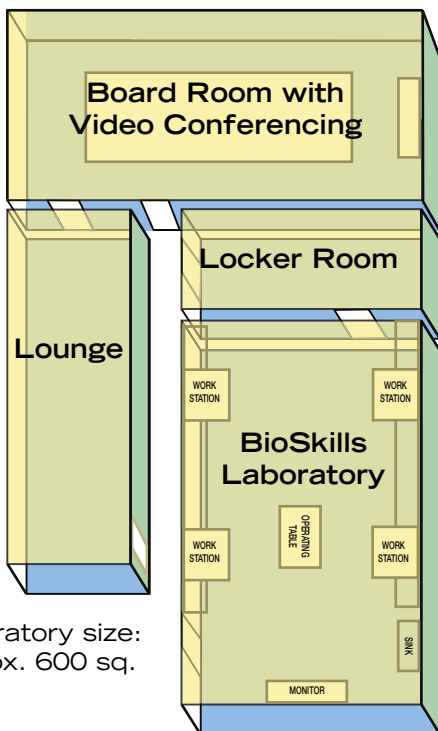

Waterproof floor with drains

Ample storage space

Freezer space available

 PINEHURST SURGICAL

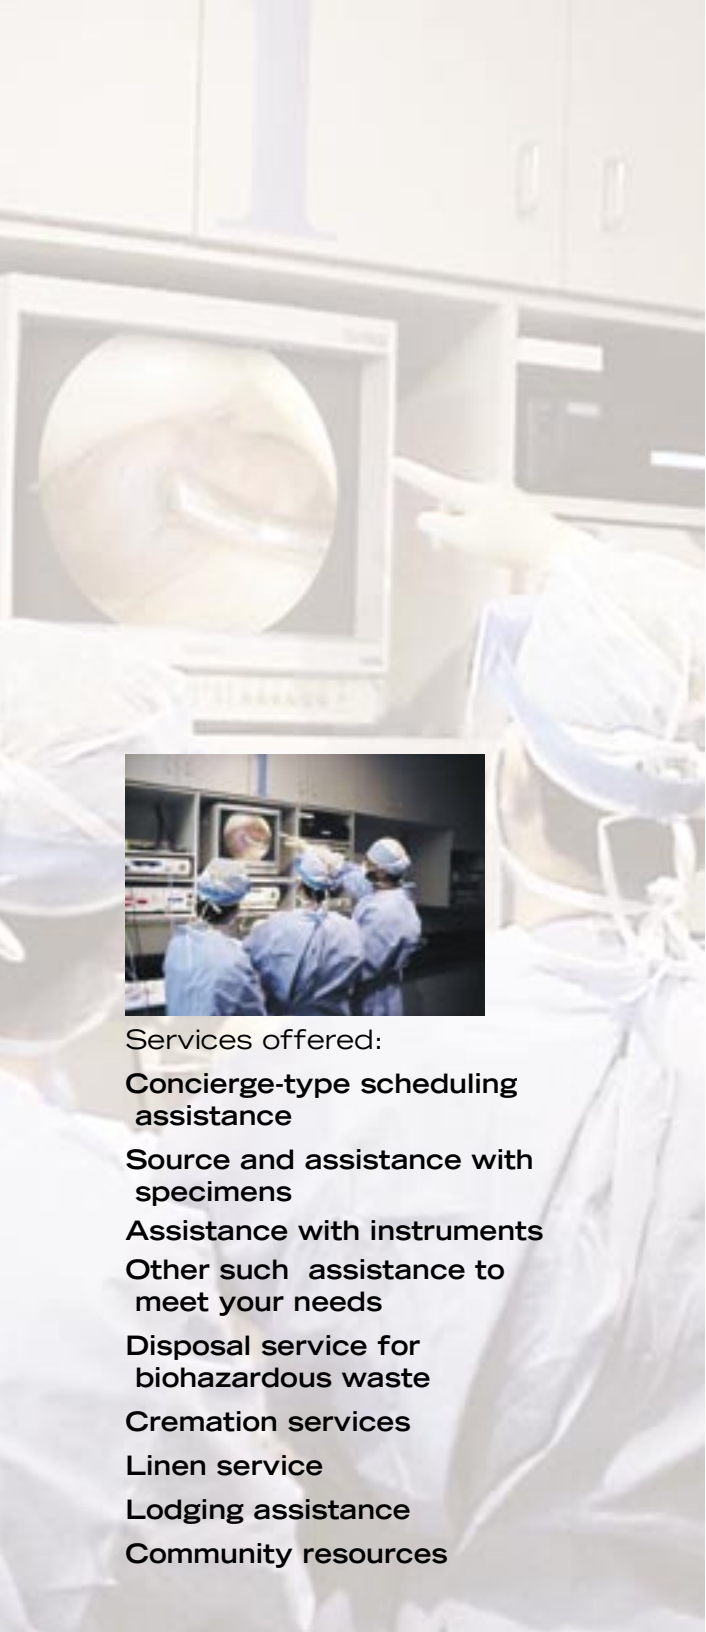

Laboratory size:
approx. 600 sq.
feet

“The BioSkills Lab, located near the Pinehurst Resort, offers physicians and industry leaders a unique opportunity to develop surgical skills and learn new procedures. As a technologically advanced lab, this facility provides a location for education with five work stations equipped with the latest in audiovisual capabilities including endoscopic and room cameras. The lab is integrated with a beautiful conference room for didactic teaching.

— Andy C. Kiser, MD, Director

The BioSkills Laboratory has been utilized by Dr. Kiser for the development of a cardiac ablation procedure for the treatment of atrial fibrillation.
