Reduce and Eliminate Shaving Bumps

Safe and effective treatments

Dr. Steve O'Brien now provides the most advanced FDA cleared laser technology for the reduction and elimination of pseudo folliculitis (PF), more commonly known as shaving bumps. These may appear on any commonly shaved area of your body. This advanced technology allows us to treat all ethnic groups and skin types safely and effectively. Hair removal in the treated area is an expected and desired outcome. Steven O'Brien, M.D. supervises all laser treatments for the reduction and elimination of shaving bumps. **Call for an expert, FREE CONSULTATION : 970-945-8503.**

Treatments that really work

Laser light is absorbed by pigment in actively growing hair, damaging the hair follicle and thus, hair re-growth is impeded, reducing and eliminating the bumps caused by ingrown hairs. The average patient sees at least a 75% short-term reduction of shaving bumps within 2 weeks after just one or two treatments.

Average treatment series

Only a portion of your hair is in the active growth phase at the time of treatment. Therefore, a series of treatments will be required to achieve the long-term improvement you desire. These treatments are spaced approximately 4-12 weeks apart, based on hair growth cycles. Long-term improvement is seen after completing a series of four to eight treatments.

Typical treatment sessions

Sessions to treat the neck or bikini area can take as little as 10-20 minutes, while a full beard and neck may take 40 minutes. Men often treat the neck area below the jaw line to increase comfort and to give a neat and clean appearance.

The cost:

Prices are adjusted, based on the actual laser time used and the difficulty of the treatment. Prices are subject to change without notice.

Individual Treatment	Price	Typical Area Treated
30 minute consultation	No charge	
10 minutes	\$100-125	Limited areas on neck or bikini area
20-30 minutes	\$150-200	Neck, beard or extended bikini area
40 minutes	\$300	Full beard or beard and neck
