Staff Physician Job Description

Staff Physicians are responsible for performing new patient evaluations including taking a full history and physical exam and detailed sleep history. They will also read and interpret polysomnograms for their patients and others as needed as well as perform follow ups. Staff physicians must be board certified in pulmonary, neurology, psychiatry, psychology or sleep medicine. They must be licensed to practice medicine in the state of Virginia. All staff physician appointments will be made at the discretion of the medical director. If not boarded in sleep medicine all polysomnograms interpreted by the staff physician will be over-read by a sleep specialist boarded in sleep medicine.
