

Cosmetic Botox Treatments

Cosmetic BOTOX® treatments are offered exclusively at our Apollo Beach office. Our

Board Certified physicians, Dr. Fred Taylor and Dr. Vincent Laganella, are trained in the procedure and are delighted to be able to provide this service in a medical office environment for their patients.

BOTOX®, an FDA-approved drug, can dramatically soften the appearance of worry lines, frown lines, laugh lines, crow's feet and other wrinkles caused by aging.

BOTOX® treatments are one of the most popular cosmetic treatments available today.

The procedure takes only a few minutes and takes effect in three to four

days. Gradually, over three to five months, the effects of the treatment will fade. When expression lines start to reappear, a simple repeat treatment is all that is necessary to maintain the desired results.

If you would like to learn more about what BOTOX® treatments can do for you, contact our Apollo Beach office for a personal cosmetic consultation.
