

Our Mission...

To provide comprehensive quality medical and surgical care for those suffering from spinal deformity without discrimination to age, disability, or financial means.

David Siambanes, DO, FAOAO

Dr. Siambanes is Board Certified in Orthopedic Surgery and is fellowship trained in Pediatric Orthopedics and Reconstructive Spine Surgery with a focus on scoliosis and spinal deformities. He received his Bachelor of Science in Biology from the University of Illinois. He received his Doctor of Osteopathic Medicine from the Chicago College of Osteopathic Medicine, Midwestern University. He completed fellowships in Reconstructive Spine Surgery from the University of Southern California and in Pediatric Orthopedics from Alfred I. duPont Hospital for Children.

Dr. Siambanes served as Director of Education, Clinical Assistant Professor of Orthopedic Surgery and Vice Chair, Department of Orthopedics at Riverside California County Regional Medical Center. He was also Co-Chairman of the Medical Advisory Team for the Children's Spine Foundation and President, Spine Section of the American Osteopathic Academy of Orthopedics. Dr. Siambanes served as the primary orthopedic pediatric surgeon for the Riverside County's division for California Children's Services. In this capacity he was involved in the orthopedic management of Cerebral Palsy and its effects on the walking child.

Dr. Siambanes is a member of The American Osteopathic Academy of Orthopedics, American Osteopathic Association, Scoliosis Research Society, and the Osteopathic Physicians and Surgeons of California. He has performed multiple presentations and published numerous articles in peer-reviewed journals. His article titled "The Influence of School Backpacks on Adolescent Low Back Pain" published in the Journal of Pediatric Orthopedics addresses a growing national concern among parents of school-children.
