

To Whom it May Concern:

Dr. Tim Kruse has been my primary family physician since he started Premiercare.

Interactions with Tim have been a pleasure. He is always accessible; phone calls and emails are returned promptly and appointments are on time and not rushed. Referrals with Specialists are made by his office or directly by Tim.

Tim's business model and personal demeanor are important but paramount is the quality and results of my medical care. My first visit with Tim resulted in referrals to a specialist in Urology and Hearing. My urinary and hearing problems were quickly diagnosed and successfully treated. These were nagging problems that could no longer be ignored.

Further consultations confirmed a serious neurological disorder...Parkinson's Disease. Subsequent treatment has resulted in virtually negating the symptoms, at least for now. Even as symptoms mounted, a number of other doctors failed to identify this important quality-of-life issue.

The solutions to these and other problems can be directly attributed to Tim's willingness to work in partnership with the patient and appropriate specialists. Instead of trying to solve all problems himself, he readily consults with an extensive network of leading healthcare professionals. I have found Tim to be universally liked and respected in the medical community.

As someone who feels the responsibility to manage my own health care, Tim and Premiercare have provided a unique corridor into the complex world of medicine. I look forward to learning how to further leverage this approach in the future.

In my view, Tim has delivered on the promises of Premiercare.

Jere Parrish, Former Vice President for Shell
