Prenatal Primer – Information for Patients

Your doctor has recommended that you review the Prenatal Primer, a web-based, interactive guide to your prenatal testing options. You may use this guide from any place where you have access to the internet.

Your link to the web site is at: www.prenatalprimer.com

- Username : OBGYNSpecialists
- Password (for all patients): prenatal

(note: you will be prompted to set up your own username and password after your first log on)

After the login screen, you will be prompted for data (name, date of birth, last 4 digits of Social Security) that will help us identify you.

The Prenatal Primer will guide you through educational and decision-support modules about your prenatal testing options. You will be asked to enter information about your pregnancy, and you will be able to explore customized information about the prenatal testing options available to you.

The entire experience will take about 15 to 30 minutes, depending on how many options you choose to explore. At the end of the guide, you will be asked to select a preferred prenatal testing option, which will be sent to our physicians. You may also print your testing plan for your reference.

Please make sure to discuss your decision on prenatal testing, and ask any questions that you have, at your next office visit.

If you have questions about prenatal testing or your pregnancy, please contact our office. If you have any technical issues or questions about the Prenatal Primer, please e-mail primersupport@labcorp.com or call 856-401-1326
