## POST – STROKE REHABILITATION CLINIC

Atul T. Patel, M.D., MHSA

Laurel Short, ARNP

- Specialized clinical and functional assessments
- Specific rehabilitative interventions (i.e. Botulinum Toxins, intrathecal baclofen)
- Comprehensive management of pain in paralyzed limbs.
- Implementation of OT/PT/Speech therapy to maintain or further improve self-care, mobility and ambulation
- Application of assistive devices  
(i.e. Braces, wheelchairs or other medical equipment)

We welcome stroke  
survivors of all ages

### REHABILITATION

“A process of helping a person to reach the fullest physical, psychological, social, vocational, and educational potential, consistent with his or her physiologic or anatomic impairment, environmental limitations, and desires and life plans”  
(DeLisa, et al 1998)
