

Post-Stroke Management

Atul T. Patel, M.D.

Susan Scheffler, MS, PA-C

Jessica Powell, ARNP

Rehabilitation Medicine

Now offering a weekly clinic to assess and provide management for patients of all ages following a stroke.

- Specialized Clinical & Functional Assessments
- Implementation of PT/OT/Speech Therapy (*as needed*)
- Muscle Spasticity Management (*i.e. botulinum toxin injections, intrathecal baclofen*)
- Assistive Devices (*i.e. braces, wheelchairs or other medical equipment*)
- Private Duty Homecare supervision
- Stroke prevention

Specialized rehabilitation management offers the best opportunity for increasing functional living skills and returning to normal activities of daily life.

Please ask one of our staff for additional information regarding appointments or contact your primary care provider for a referral.
