Since 1955, Livingston HealthCare has provided premier quality healthcare to the residents of Park County and surrounding communities. We keep our community healthy with a broad scope of services, provided by well-trained and highly-skilled professionals. At Livingston HealthCare, we believe that **the way we care** is as important as the healthcare services we provide. That's why we like to say that we're more than just healthcare. We're really **the heart of community care.**

What Is Teleradiology?

At Livingston HealthCare we provide imaging services 24-hours a day through the use of teleradiology. Teleradiology is the electronic transmission of diagnostic images, such as X-rays, CTs, and MRIs, from one location to another for the purposes of interpretation or consultation by a radiologist.

While Livingston HealthCare has a radiologist onsite during the day, teleradiology provides a safe and cost-effective way to provide continuous radiology coverage. Images can be sent to another Montana hospital, or to other locations around the world. A combination of highly specialized software and secure, high-speed Internet access is used to transmit the images and enable the radiologist to analyze the images for a given study. This service improves patient care by allowing radiologists to provide services without being at the patient's location.

the heart of community care

For your health, our campus is tobacco free.

What are Imaging Services?

The Livingston HealthCare Imaging Department offers diagnostic testing that can provide a window into your body. In addition to conventional X-rays, the Imaging Department performs many diagnostic tests. These range from mammography and CT scans to studies involving nuclear medicine, ultrasound, MRI, and bone density testing.

For Your Convenience

X-rays are offered at Park Clinic River Drive and Park Clinic West Crawford during regular business hours. All imaging services at Livingston Memorial Hospital are provided on a flexible schedule by appointment to meet the needs of our patients.

Using technology, we can create an image of what's going on in your body.

Imaging Services

A radiological exam uses imaging technology to see inside a specific area of your body. Livingston HealthCare offers several different types of diagnostic exams at Livingston Memorial Hospital and Park Clinic. These services include:

- CT Scan
- DEXA-Scan
- Digital Mammography
- MRI
- Nuclear Medicine
- Ultrasound
- X-ray

Patient Criteria

Your test may require a referral from your physician. Please speak with your physician or call our office at 406-823-6441 if you have questions.

Insurance Coverage

Most health insurance companies, including Medicare, cover diagnostic imaging services. Some companies may require pre-authorization. At your request, our business office would be happy to verify your insurance coverage for you.
