The chart above depicts a vaccine schedule that complies with current recommendations of the American Academy of Pediatrics. The exact timing of vaccines depends on each individual child's health, the availability of each vaccine, and provider and family preferences at the time of each visit. Insurance companies vary on coverage of vaccines. "Catch-up" vaccines can be administered at almost any visit to this office. Ask your provider if your child is "Up To Date". * Ask about our policies regarding immunizations for adults.
